PROJECTS DONE

- (Group Project) was a part of a team where we developed a Parking area reservation system.
- Developed a single vender ecommerce website where user/customer can order vegetables. Back-end is done in PHP.
- Developed a Hospital management system. There are three modules in this system Receptionist module, doctor module and Admin module. Receptionist can take appointment and can create a new patient. Doctors can insert the patient details in the system which will remove the paper format report in the hospitals or clinic. Back-end is done in PHP and AJAX.
- Develop a Covid-19 data displaying site that display total number of infected people and other data using ReactJS by getting data from API. Use of React Hooks to get the data from API.
- Develop a To-Do application on ReactJS.
- Develop a Portfolio website on ReactJS using react router.
- (Group Project) was in a part of a team where we develop a dynamic news Portal website according to the client requirement.

* All my above-mentioned projects are on my GitHub.
