### PROJECTS DONE

---

- (Group Project) was a part of a team where we developed a Parking area reservation system. This idea is developed before Kathmandu metropolitan city announce about smart parking.
- Developed a single vender ecommerce website where user/customer can order vegetables which will be delivered to their home. Back-end is done in PHP.
- Developed a Hospital management system. There are three module in this system Receptionist module, doctor module and Admin module. Doctor's can insert the patient details in the system which will remove the paper format report in the hospitals or clinic. Back-end is done in PHP and AJAX.
- Develop a Covid-19 data displaying site that display total number of infected people and other data using ReactJS by getting data from API. I develop this site with the help of YouTube because it was my first project on ReactJS.
- (Group Project) was in a part of a team where we develop a dynamic news Portal website according to the client requirement working remotely through GitHub.

\* All my above-mentioned projects are on my GitHub.

### Languages and Technologies

---

- Programming Languages - Core PHP, AJAX, ReactJS(basic), Java(basic)
- Operating System - Windows
- Database - MySQL
- Frameworks and tools – GitHub, xampp
